

Play with ssurv.csv

1. import it
2. Investigate / identify several quantitative / categorical vars.
3. Guess at what the story is behind these variables

RStudio:

↑ to previous commands

Esc to get a cursor

Ctl-L to clear console

name output as 'var'

var = ...

var <- ...

... -> var

Commands we used:

head()

help()

names()

read.csv()

tally()

gf_bar()
