A

1. (a) and (b) are possible bootstrap samples.
   (c) is not, having 7 values (the original has 6)
2. (a) $SE_{\bar{x}} \approx 5$
   (b) $\mu \approx 300$
   (c) decrease
3. $\hat{p} \pm 2(SE_{\hat{p}}) = 0.41 \pm (2)(0.025)$, or $(0.36, 0.46)$
4. (iii)
